ABOUT ME

Hi, I am Igsaan Fabrik, and I started my own business in furniture manufacturing because of my love and passion for working with wood.

HISTORY

After working for two companies, which were both liquidated, Igsaan decided to rise to the challenge and walk the demanding but rewarding road of an entrepreneur, when he started I & S Projects in February 2021. Currently on offer are custom built-in cupboards, wardrobes, vanities, shopfitting, flooring, carports and general maintenance work, making I & S Projects the ideal one-stop service when it comes to home improvement and renovation.

MISSION

To manufacture products that our customers love and feel proud of when they show them to their friends and to reach this goal by carefully listening to their need and deliver the final product on time and on-spec as part of our promise of quality.

VISION

By manufacturing and providing quality products and craftsmanship, I & S Projects want to expand and be able to employ people with a similar love for the furniture industry.

HIGHLIGHTS

Since I & S Projects were founded, a host of successful projects have been completed to the satisfaction of its customers. These include beautiful wooden outdoor gates, indoor shelving, complete kitchen makeovers, a custom TV-wall and beautiful louvres to let in just the right amount of light.
